

## ABOUT THE AUTHORS

Arsenio M. Balisacan is Professor of Economics at the University of the Philippines-Diliman. He has served as Undersecretary (Deputy Minister) of Agriculture of the Philippine Government and has taken many consultancy and advisory roles for various institutions, including the World Bank, Asian Development Bank, and various United Nations agencies. He is author and co-author of numerous articles and books on poverty, food security, and agricultural and rural development.

Bob Baulch is a Fellow of the Institute of Development Studies at the University of Sussex. His research and publications focus on agricultural marketing and price analysis, poverty (in particular the dynamics of rural poverty), and the application of quantitative techniques to development policy. He has worked in 15 African and Asian countries, including long-term assignments in Papua New Guinea, Sudan and Vietnam.

Anil B. Deolalikar is Professor of Economics and Director of the South Asia Center at the University of Washington, Seattle, USA. He taught previously at the University of Pennsylvania and at Harvard University. He has published in a number of areas, including poverty, health, education, labor market, and population issues in developing countries.

Jean Drèze is Honorary Professor of Economics at the Delhi School of Economics, where he teaches development economics and public economics. He has written on wide-ranging aspects of economic development (with special reference to India), including famine prevention, demographic change, elementary education, social policy, and the humanitarian consequences of armed conflict. His publications include *Hunger and Public Action* (co-authored with Amartya Sen), *India: Economic Development and Social Opportunity* (co-authored with Amartya Sen), and *Public Report on Basic Education in India* (co-authored with Anuradha De and others).

Vinay K. Gidwani is Assistant Professor in the Department of Geography and the Institute of Global Studies, University of Minnesota, Minneapolis. He received his Ph.D. from the University of California, Berkeley (1997). His regional focus is western India and his current research interests include geographies of work; the political economy of development; agro-ecological change; the intersection of class and cultural politics; and critical social theory.

Medhi Krongkaew is Professor of Economics at the Thamassat University in Bangkok, Thailand. In 2001, he was Visiting Research Fellow at the Centre for Southeast Asian Studies in Kyoto University, Japan. He is currently serving as the chair of the APEC Economic and Technical Cooperation (ECOTECH) Subcommittee.

Vani S. Kulkarni is a doctoral candidate in sociology at the University of Pennsylvania. She is currently engaged in field-work for her doctoral dissertation in Karnataka, India, which looks at decentralized health care. She can be reached at: Department of Sociology, 3718 Locust Walk, University of Pennsylvania, Philadelphia, PA 19104, USA (tel. 215-898-6709, email: vanik@sas.upenn.edu).

Michael Lipton is Research Professor of Economics, Poverty Research Unit, Sussex University. His research covers agricultural and rural development, and poverty reduction, with special reference to nutrition, land reform, agro-technical change, demography, and foreign aid. His books include *Assessing Economic Performance* (1968), *Why Poor People Stay Poor: Urban Bias and World Development* (1977, 1988), *New Seeds and Poor People* (with Richard Longhurst, 1989), *Does Aid Work in India?* (with John Toye, 1991) and *Successes in Anti-poverty* (with Shahin Yaqub, 1998). He has worked mainly in India, Bangladesh, Sri Lanka, Botswana and South Africa, and for international organisations, most recently as lead scholar for the International Fund for Agricultural Development's *Rural Poverty Report 2001*.

Neil McCulloch is a Fellow at the Institute of Development Studies at the University of Sussex. His research and publications focus on analyzing the impact of public policy upon poverty in developing countries. He has worked in China, Kenya, Pakistan, South Africa and Swaziland.

Ernesto M. Pernia is Lead Economist at the Asian Development Bank (ADB). His areas of interest include development economics, population and human resources, and urban and regional economics. He has written a number of books and papers in professional journals and in edited volumes. Besides research, he has carried out economic and sector work for Southeast Asian countries. Prior to the ADB, he was Professor of Economics and has served as Chairman of the Economics Department at the University of the Philippines. He was also a consultant to several international organizations. He was President of the Philippine Economic Society and Co-Chair of the Federation of ASEAN Economic Associations.

Amartya Sen is Master of Trinity College, Cambridge. He has made wide-ranging contributions to philosophy and economics, especially welfare economics and development economics. His recent books include *On Ethics and Economics*, *Inequality Reexamined*, *Development as Freedom*, and *India: Economic Development and Social Opportunity* (co-authored with Jean Drèze). He won the Nobel Prize for Economics in 1998.

Saurabh Sinha is Research Economist, Poverty Research Unit, Sussex University, and is presently on leave to head the GTZ's Poverty Monitoring Unit in Nepal. He

is a development economist with more than 15 years' research, development management and advisory experience in India, Bangladesh and Nepal, and recently Thailand and Zimbabwe. His areas of research specialization include institutional economics, rural poverty, and rural land and credit markets. His emerging research interests are in poverty monitoring, inter-generational poverty, child labour, and globalisation.

Peter Warr is the John Crawford Professor of Agricultural Economics and founding Director of the Poverty Research Centre in the Division of Economics, Research School of Pacific and Asian Studies, at the ANU. He has published extensively on the Thai economy and was recently a Visiting Professor of Economics at the Faculty of Economics at Chulalongkorn University in Bangkok. He has been a Special Advisor on Economic Policy to the Secretary General of the Thai government's Ministry of Agriculture and Cooperatives and has also acted as a consultant to the World Bank, the Asian Development Bank, various United Nations agencies and AusAID. He is a Fellow of the Academy of Social Sciences in Australia.

Shahin Yaqub is at Sussex University, England. His interests concern temporal issues in poverty. This includes poverty dynamics, vulnerability, and risk as factors in short-run mobility. It also includes intergenerational poverty, social opportunity and reversibility of damage from childhood poverty as factors in long-run mobility. His doctoral research is titled "Born Poor, Stay Poor?"
